

New Product Alert!

Shotgun Style Mock Intake & Blower for most 1/12th - 1/8th scale Bodies

#73543 **Chrome Shotgun Style Mock Intake & Blower**
UPC #672415735435

We're adding another intake style to our line up with our Shotgun Style Mock Intake and Blower. Our newest scoop design perfectly mimics the more modern trend of a double-barrel shotgun hood scoop and looks incredible on a wide variety of 1/12th - 1/8th scale vehicles. Our Shotgun Style Mock Intake & Blower Set will take the scale realism of your favorite muscle car or monster truck to a whole new level and show off that muscle you know it has!

The **RPM** molded Shotgun Style Intake and Blower is finely detailed with such finishing touches as blower belt ridges, pulley splines, and recessed butterflies in the scoop. Additionally, we made it simple to bolt it on to almost any hood that is relatively flat by angling the entire unit to 7°, a very typical hood slope. That means the blower unit will sit properly and accurately on a wide variety of applications. It all bolts together with only 3 small screws.

Each **RPM** Shotgun Style Intake & Blower comes complete with all the hardware you'll need to bolt it to your favorite ride (you'll need to supply your own 1/8" diameter (3mm) drill & a 2mm hex driver) and even includes a wide support plate that bolts underneath the body to prevent hard impacts from ripping the blower assembly off of your vehicle.

You already know your ride is ridiculously fast, step up the cool factor with **RPM!**

Tech Notes: The **RPM** Shotgun Style Mock Intake and Blower Set is for appearance only and is not a functioning unit. **RPM** warranty restrictions may apply due to the scale nature of the design. Please see the **RPM** warranty page at www.rpmrcproducts.com/faq/warranty.htm for more information.
