

## *New Product Alert!*

**#72082      Heavy Duty Front A-arms for the Losi Mini-T 2.0 & Mini-B**  
UPC #672415720820

If you've been breaking stock A-arms on your Losi Mini-T 2.0 or Mini-B, **RPM** has a tough alternative you'll love. Our replacement front A-arms have been beefed up in all the right places. Check out some of the updates we made (in comparison to HD, 2<sup>nd</sup> gen stock Losi A-arms):

- The front inner hinge pin boss is roughly 25% thicker than stock (and dramatically thicker than first gen A-arms)
- We've increased the overall thickness of the A-arm by roughly another 25%.
- Support beams are consistent on thickness and are roughly 50% thicker than some of the thinner supports of the stock A-arms.
- Beefier A-arm support beams provide better shock pivot protection, meaning the A-arm will be the 1<sup>st</sup> to strike debris instead of the shock pivot ball.

All of these strengthening upgrades, combined with some of the best engineering grade nylons in the industry equate to a set of ultra lightweight replacement A-arms that have unmatched durability and performance. Place your trust in American made. Trust **RPM**.

**Tech Notes:** Replaces the front A-arms from stock Losi #LOS214003.

**Suggested Retail Price      € 11,20**
