Rear Mud Guards for the 4S v2 ARRMA Kraton & Outcast

#81962 **Rear Mud Guards for the 4S v2 ARRMA Kraton & Outcast**
UPC #672415819623

RPM Rear Mud Guards for the 4S v2 ARRMA Kraton & Outcast help prevent dirt and mud build-up in your rear suspension and drive-line components. **RPM** Rear Mud Guards keep the debris kicked up by your front wheels off of the rear shocks, turnbuckles and driveshafts. By keeping those components clean, your suspension and drive-line will last longer and run much smoother between cleanings.

RPM Mud Guards are extremely lightweight (weighing in at only 8.5g. each). Our Mud Guards are sold in pairs and include mounting hardware (unlike stock ARRMA mud guards). **RPM** Mud Guards are molded in our engineering blend of incredibly strong nylons. For protection you can trust, look no further than **RPM**.

Tech Notes: **RPM** Rear Mud Guards for 4S v2 versions of the ARRMA Kraton & Outcast are sold in pairs. Designed to fit stock ARRMA rear A-arms (ARRMA #ARA330710) and **RPM** Rear A-arms (**RPM** #81792). Also replaces stock ARRMA #ARA311209.
