Looking to upgrade your Traxxas BL-2 Slash 4x4, Rustler 4x4, Stampede 4x4, or Bigfoot 4x4 with camber links that actually improve performance and look incredible doing it? Meet your new favorite upgrade.

Our molded camber link set is built from engineering-grade materials - seriously tough stuff - and backed by our industry-leading breakage warranty. They're also slightly lighter than stock, trimming unnecessary weight while maintaining strength where it counts.

But this isn't just a durability upgrade - it's a geometry upgrade. At the rear, we've reduced negative camber slightly to square the tires more evenly to the ground. The result? Better forward bite under acceleration and more even tire wear. Up front, we've dialed back excess negative camber to improve traction, reduce uneven wear, and make better use of your truck's 4WD capability.

And because mismatched factory links make no sense, every piece in this set shares a cohesive, matching design. Front to rear, everything finally looks right.

Durability. Smarter geometry. Better traction. Cleaner wear... All in one upgrade and Made in the USA.

Tech Notes: *RPM* BL2 Camber Link Sets replace stock Traxxas #6748. Includes a full set of four camber links to complete one full vehicle.

Suggested Retail Price €8,40 / set
